

Designed
to protect.

Your design. Our protection.

Benefits at second

Highest safety

For people and property.

Great choice

Huge variety of colours and profiles available.

Universal application

For corners and edges in every environment.

Adaptable design

Perfect adaption to existing design concepts.

Colour-fast

Due to reverse printing on innovative protective film.

Unbreakable

Polyurethane core guarantees maximum absorption strength.

Easy installation

Due to high-performance adhesive.

Tried and tested

More than 40 years of experience of the market leader.

Best quality

Patented and manufactured in Germany.

Fire protection

Classified according to DIN 4102 B2 and according to UL 94HB/10 mm.

Invisible protective profiles.

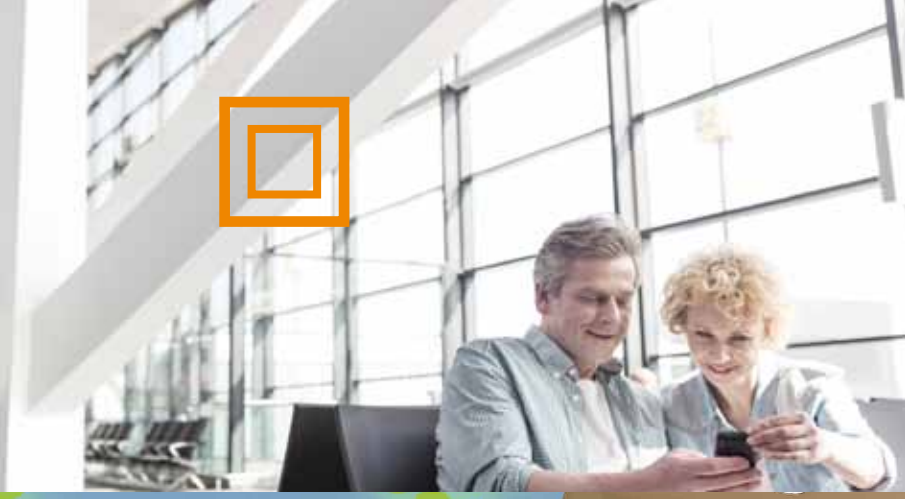

Whether in public or industrial spaces:

Our protective profiles meet the highest demands of every design concept – without being noticed. Thanks to a great choice of colours and a huge product range for corners, edges and surfaces.

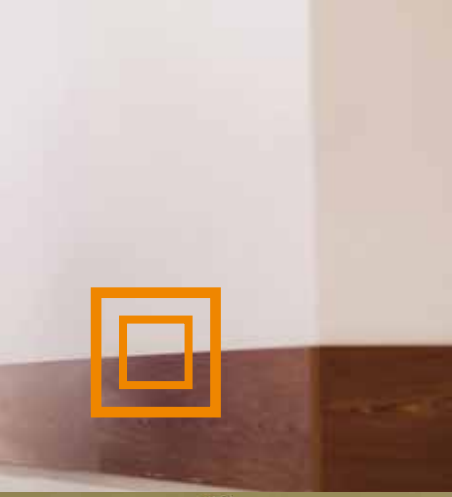

Perfect protection combined with best quality: This concept makes Knuffi® hugely successful around the world. Tested and used in any environment:

- Day care centers, schools and universities
- Hospitals and rehab centers
- Shopping malls and fitness centers
- Living rooms, kitchens and bathrooms

Using an ultra-modern, patented production method, our profiles are manufactured according to the latest standards. More than 40 years of experience, top quality and highly trained staff – that's what we stand for. Our core product "Knuffi®" has made us one of the world's market leaders. When it comes to protection of people and property you will not find a better solution.

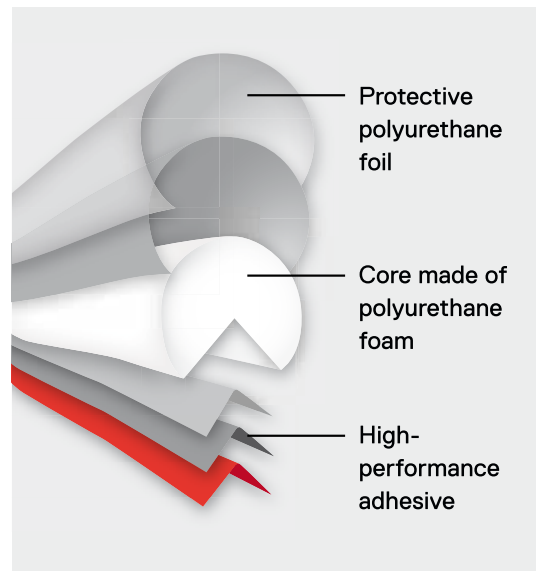

Discreet.
Effective.
Individual.

Quality. Made in Germany.

Knuffi® offers excellent brand quality. It absorbs high forces of impact, is extraordinary flexible and easily installed – even on curved surfaces. Only Knuffi® is colour-fast, recyclable, fire resistant and can be produced in lengths up to 50 metres. Designed to protect – even in rough conditions.

The secret of our success lies in our special, patented production process and the intelligent product design: A polyurethane core is sheathed by a highly resistant polyurethane film. Reverse printing on the backside of the film assures the colours are protected. For easy installation a light- and ageing-resistant, high-performance adhesive is applied to the back.
